## PROJECTS

### My Portfolio

Mar 2022

- Designed and coded from scratch to showcase my skills and timeline.
- Built responsive UI using HTML, CSS, JavaScript, React and React Bootstrap.
- Utilized EmailJS library to send email directly from React component.

### Realtime Chat Application

Feb 2022

- Implemented Node.js as the back-end API and React.js as the front-end.
- Enabled real-time communication between client and back end by using Socket.IO.
- Configured and deployed the server code to Heroku to construct the back-end API.

### Pho Chopstix

Aug 2021

- Built and designed website for a small restaurant using HTML, CSS, JavaScript and React.js.
- Discussed site and app requirements with clients to produce actionable development plans and budgets.
- Implemented Google-based SEO to increase reach of targeted audience.

## EXPERIENCE

### Front-End Developer Intern

Sep 2021 - April 2022

Taubyte

Remote

- Develop Taubyte websites using HTML, CSS, Sass, JavaScript, and Vue.js.
- Use Jira and Bitbucket to efficiently collaborate with other developers and track bugs.
- Run debugging tools such as Vue.js devtools and Chrome Inspector to eliminate flaws and glitches.
